Reducing Viral Load in Public Spaces

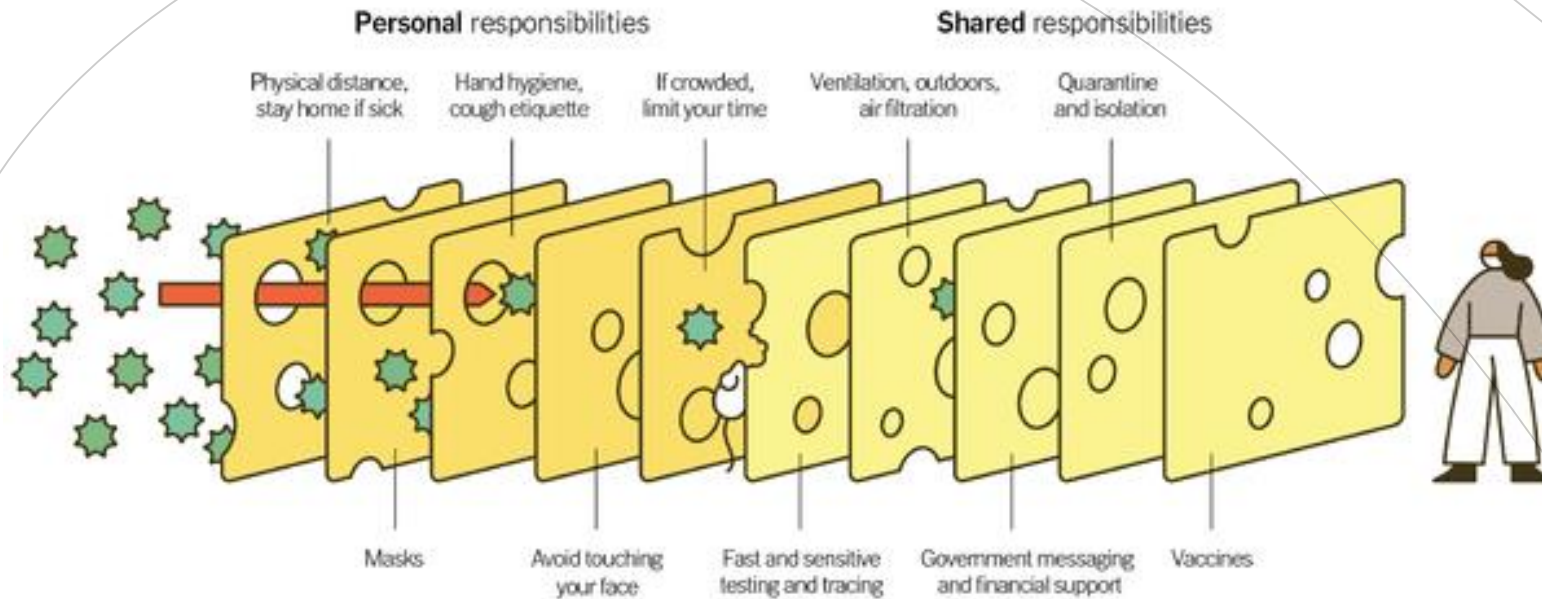

Solutions for clean safe
living, operating and
working environments

INTERCARGO | Semi-Annual Meeting 11 & 12 March 2021

SWISS CHEESE MODEL OF PANDEMIC DEFENCE

Multiple Layers Improve Success

The Swiss Cheese Respiratory Pandemic Defense recognizes that no single intervention is perfect at preventing the spread of the coronavirus. Each intervention (layer) has holes.

Sanitizing Solutions

Reducing Viral Load in Public Spaces

Solutions for clean safe living, operating and working environments

The onset of a global pandemic has demonstrated that there is not one solution to eliminate the risk of infection, but a layered approach to reduce the viral load and minimising the risk of spreading infections

NEW PRODUCT

Intelligent UV Sanitizing Light Fixture

FRIDO TECHNOLOGIES

UV Light is an established and well known method of sanitizing spaces, ventilation ducts, ballast water and medical equipment. In a world of increasing passenger travel and cross border movements the risk of infection has become a primary concern for many people and businesses

Traditional UV Sanitising Technology is efficient in reducing the viral load but is harmful to people

FRIDO TECHNOLOGIES have developed a UVC Lamp that can cohabit with people using a lower wavelength light making it safe for people whilst still effective on viruses, such as SARS, H1N1, NOROVIRUS, INFLUENZA, COVID-19 and MRSA

The lamp can be safely fitted in ceilings and deckheads in public spaces, elevators, areas of high foot traffic and reduces the viral load while the spaces are occupied, the light unit works with mains power and is simple to install with a low power consumption

CHEMICAL CLEANING

ANTI MICROBIAL TECHNOLOGY FROM NANOPHOS

In order to further reduce risk of infection, cleaning and sanitizing chemicals are also an essential part of the defence against viruses and microbes and reducing the viral load

NanoPhos produce a range of bio-friendly hand gels and chemicals for daily cleaning and sanitizing use:

DeSalin ECO | Aerosol detergent for cleaning and sanitizing

DeSalin MAS | Created for fogger devices

DeSalin AirClean | Detergent for cleaning HVAC units

DeSalin Kalk | An acidic formulation that eliminates salt deposits

DeSalin Lime | Calcium hydroxide base for cleaning and disinfecting hard floor surfaces, ideal for tiles, stone and marble surfaces

All the above that can increase efficacy against viruses and microbes

PERSONAL PROTECTIVE EQUIPMENT

Provision of PPE equipment for the safety of you and your team

Supply of:

- Electric Fogger
- Face Masks
- Face Shields / Eye Protection
- Single Gloves
- Single Use Shoe Covers
- Disposal Bags
- Disposable Overalls
- Hand Sanitizing Gel

FOGGING SERVICES

As part of the effort in reducing the viral load regular fogging of spaces is also a key part of reducing the viral load. This is an integral part of the disinfection process keeping spaces clean and hygienic

The services can be carried out by our team who provide a turnkey solution, supplying the chemicals, measuring of hygiene with an electronic meter, prior to and after application

The chemicals used are bio-friendly and protect the working area for up to 45 days
